

Key Findings of ACORP's Report:

- **2.8% additional growth per annum on community rail routes**

Passenger use of lines served by Community Rail Partnerships has shown greater percentage growth than the national rail network or regional services.

- **CRPs more than pay for themselves, adding economic, social and environmental value.**

All the CRPs in the study achieved a cash surplus, in both lower and upper growth scenarios, indicating that CRPs create more income than they cost to run.

- **3,200 community rail volunteers give 250,000 hours per year in support, giving an annual financial value of £3.4m.**

Volunteers are often motivated by reasons other than simply supporting the railway, including a desire to serve the community, constructive use of their time, seeking a sense of purpose and engaging in mental and physical exercise.

- **Station adoption is an outstanding low-cost/high-benefit measure.**

This can be particularly so where security or other problems can be addressed without high capital expenditure.
